

Case Study CS2

Generators

BurtonwoodTM
Generator & Switchgear Services

Length of relationship:

8 years - ongoing

Location(s):

Birmingham Airport

Successes:

Working in a highly secure environment like an Airport means that our personnel must undergo stringent security checks before they are authorised to work, and must maintain security practices at all times. In addition, to meet the Airport's own high standards for health and safety, work must be carried out accordance with set regulations – regulations which we readily embrace and seek to meet or wherever possible exceed.

The Burtonwood Group's success in co-operating with the Airport on these standards and principles, together with our reliable and efficient service, has contributed to our long standing association with this client.

Work undertaken:

In addition to the supply and installation of two new 400kVa generators, The Burtonwod Group has supplied integrated controls and associated LV distribution panels to Birmingham Airport

The Power of Experience

We can offer you even more ...

We may not know what power generation services you would like but we do know we have already developed a solution for your application.
